EDUCATION

Jordan University of Science and Technology

Irbid, Jordan

Bachelor of Engineering in Network Engineering — GPA: 3.64/4.0

Graduated

- Dean's List, 2023–2024

EXPERIENCE

Jordan Open Source Association (JOSA)

Amman, Jordan

Open Source Developer — OpenLab Apprentice

May 2026 – Present

- Contribute to established open-source projects through JOSA's OpenLab apprenticeship, working with production codebases and upstream development workflows.
- Collaborate with open-source communities through code review, issue investigation, implementation, testing, and technical research.

8BillionMinds

Tadworth, United Kingdom

Software Engineering Volunteer

Feb 2026 – May 2026

- Maintained and improved a large-scale education platform built with Java 8 and Spring, resolving critical issues across a complex codebase.
- Designed and implemented core components of the notification and email system, improving system reliability and user engagement.

42Irbid

Irbid, Jordan

Software Engineering Intern

Jun 2025 – Present

- Reimplemented key components of the C standard library (including printf and getline) from scratch in pure C.
- Developed an algorithm cost optimization project in C, focusing on performance and efficiency.
- Built Python projects emphasizing object-oriented design and clean architecture.

MADAR

Amman, Jordan

Software Engineering Intern

Jul 2025 – Sep 2025

- Designed and implemented two backend microservices for a GIS platform using Kafka, Node.js, Express, TypeScript, and MongoDB.
- Improved system modularity and scalability through microservices architecture.

PROJECTS

SumHub

- AI-powered research paper search engine using MongoDB Atlas and Gemini API.

RenderChad

- Simple render engine written in pure C++ with zero dependencies, built to test CPU parallelism and learn more about computer graphics.

IOTA Decentralized DNS

- Leaderless IP state protocol using Go and IOTA, achieving full decentralization.

TECHNICAL SKILLS

Languages: C, C++, Java, Go, JavaScript, TypeScript, HTML/CSS, PostgreSQL, Python

Frameworks: Spring, Hibernate, React.js, Node.js, Express, Jest, Tailwind CSS, Material UI

Tools: Docker, Kafka, Kubernetes, Git, GitHub, Linux, MongoDB Atlas, AWS

Concepts: Distributed Systems, Blockchain, Cryptography, System Design, Networking

AWARDS & ACHIEVEMENTS

- Top 20 — National CTF Competition (NCSC)

- Winner — Best Use of MongoDB Atlas — HackThisFall 2024

CERTIFICATIONS & LANGUAGES

Certifications: AWS Cloud Practitioner (In Progress)

Languages: Arabic (Native) , English (Professional Proficiency)
